

## **Semi-Permanent Eyelash Extensions process**

Semi-permanent eyelash extensions are single strands of natural or synthetic fibers that are attached to the natural lashes at a 1:1 ratio using a surgical grade adhesive. The client has to be laying down with their eyes closed for this process. The lower lashes are secured with an under eye gel pad, paper tape, or waterproof tape to prevent lower lashes from sticking to top lashes. Once that is done the natural lashes are cleaned and brushed (to separate and groom) prior to application as well. Then eyelash extensions are added at a 1:1 ratio to natural lashes using surgical adhesive to achieve the desired look the client requested. Once the desired look has been achieved the lashes are brushed once again to separate them, then blown dry to prevent clumping, the tape is removed, and the process is finished

### **Pricing**

\$150 for full set

\$55 for 1 week refill

\$75 for 2 week refill

\$85 for 3 week refill

\$25 for lash removal

- You need to have at least 30% of your lashes for it be considered a refill (approximately 20 lashes per eye). If you have less than 30% you need a full set. Please schedule a full set instead of a refill.
- Pricing subject to change via monthly specials
- Please do not wear any eye makeup to lash appointments and come alone

### **After care**

\*Do not wet your lashes for 12-24 hrs after application. This includes steam, sweat, and also water.

\*Brush lashes at least once a day to straighten your lashes and this also helps to promote growth of your natural lashes

\*Do not use eyelash curlers. This may break the bond of the adhesive used on the eyelash extensions.

\*Do not use waterproof mascara. This will degrade the adhesive.

\*Use oil-free makeup removers.
